

NGUUMA TSAVBEE

AI INTEGRATION | PYTHON BACKEND | COMPUTER ENGINEERING

Email: ntsavbee@gmail.com | Phone: +2349054892935

LinkedIn: Nguuma Tsavbee | GitHub: github.com/Tsavbee

PROFESSIONAL SUMMARY

Computer Engineering graduate with practical experience in Python backend development, AI-assisted software development, cybersecurity, IoT systems, and software quality assurance. Experienced in building REST APIs, integrating databases, designing intelligent system workflows, and using generative AI tools for research, debugging, documentation, and development. Interested in AI integration, backend engineering, cybersecurity, and intelligent software systems.

CORE COMPETENCIES

- AI Integration & Prompt Engineering
- Python Backend Development
- REST API Development
- Cybersecurity & Vulnerability Assessment
- Software Quality Assurance
- IoT & Embedded Systems
- Technical Research & Documentation
- Analytical Problem Solving

EDUCATION

Bachelor of Engineering (B.Eng.) in Computer Engineering
Federal University of Technology, Minna

TECHNICAL SKILLS

Programming & Backend: Python, FastAPI, PHP, CodeIgniter, REST APIs, JSON

Databases & Tools: PostgreSQL, MySQL, SQLAlchemy, Alembic, Git, GitHub, VS Code, pgAdmin, VirtualBox

AI & Automation: Generative AI, Large Language Model fundamentals, Prompt Engineering, AI-assisted development, AI workflow design

Cybersecurity & IoT: JWT authentication, vulnerability scanning, API security testing, ESP32-S3, BLE, GPS/GNSS, MPU6050, Supabase

PROJECT EXPERIENCE

CyberShield – SME Cybersecurity Risk & Vulnerability Platform

- Built backend services and REST API workflows using Python, FastAPI, PostgreSQL, and SQLAlchemy.
- Implemented authentication, authorization, asset ownership verification, vulnerability scanning, and risk-calculation logic.
- Applied AI-assisted development for debugging, architecture planning, research, and technical documentation.

Intelligent BLE/GPS Item Tracking System

- Designed intelligent switching between BLE proximity tracking and GPS outdoor positioning.
- Integrated motion-based theft detection, sensor processing, cloud data storage, and real-time alert workflows.

Web-Based Automated Pupils' Report Card Management System

- Designed a web-based academic records system using PHP, CodeIgniter, and MySQL.
- Developed system workflows, database structures, use cases, ER diagrams, and process flowcharts.

PRACTICAL EXPERIENCE

ICT Department – Jos University Teaching Hospital (JUTH)

- Supported computer systems, networking, troubleshooting, and general ICT operations in a healthcare environment.

Software Quality Assurance – Metsad Group Website

- Performed functional and regression testing, identified defects and usability issues, and verified fixes against expected behavior.

AI PROFICIENCY

- Generative AI & LLM Fundamentals
- Prompt Engineering
- AI-Assisted Software Development
- AI API & Workflow Integration Concepts
- Machine Learning Fundamentals
- AI-Assisted Research, Debugging & Documentation

RESEARCH & ACADEMIC EXPERIENCE

- Conducted technical research, system analysis, and documentation for engineering projects.
- Produced structured technical reports, system architectures, flowcharts, and presentations.
- Applied software, networking, embedded-system, and cybersecurity concepts to practical engineering problems.

ADDITIONAL INFORMATION

Career Interests: AI Integration, Backend Development, Cybersecurity, IoT Software Engineering

Work Preference: Remote / Hybrid / On-site
